TRANSPORTATION OF THE MK SEALED BATTERIES

Certificate of compliance to IATA/ICAO special provision A67

The MK Sealed Battery is classified as 'non dangerous, not restricted for air transport and exempt from hazardous material regulation. The product meets the pressure, vibration and special provision A67 crack/rupture test of the International Air Transport Association (IATA) and the International Civil Air Organisation (ICAO). The battery is also exempt from the US Department of Transportation Hazardous Material Regulation contained in the title 49 of the Code of Federal Regulations (CFR) parts 171-189. The battery is not restricted for water transport and is classified as non hazardous per IMDG amendment 27.

What this means is that you can travel with your wheelchair or scooter in public transportation on land, by sea or by air. Your wheelchair or scooter can also be shipped to a location by any of the mentioned forms of transportation in a non hazardous material shipping classification. Please retain the above certificate for handy reference when travelling with or shipping your wheelchair or scooter.
